

CustomPop 😊 :

- Key Points in this :

→ Splash Screen

→ First Screen to Second Screen

→ Second Screen to First Screen

→ Card View with Shadow and Image

- SplashScreen (When we open the app and it shows as the 2 or 3 second welcome screen)

Code :

```
Handler(Looper.getMainLooper()).postDelayed({  
    startActivity((Intent(this, MainActivity::class.java)))  
    finish()  
},2000)
```

Note :

This code tells Android:

1. **Wait 2 seconds.**
 2. **Then switch to MainActivity.**
 3. **Close the current screen.**
-

* How to set a Screen Button to the next Screen View :

Code :

```
var Button1 = findViewById<Button>(R.id.buttonOne)  
Button1.setOnClickListener { v ->  
    val intent = Intent(this, SecondScreen::class.java)  
    startActivity(intent)  
}
```

* How to set the first screen from the second Screen :

Code :

```
val Buttonsecond: Button = findViewById(R.id.button)  
Buttonsecond.setOnClickListener { v ->
```

```
finish()  
}
```

* How to set Top Header of the App :

Code :

```
<LinearLayout  
    android:id="@+id/topheader"  
    android:layout_width="match_parent"  
    android:layout_height="70dp"  
    android:background="@color/black"  
    android:gravity="center_vertical"  
    android:paddingEnd="16dp"  
    android:paddingTop="30dp"  
    android:paddingStart="20dp"  
    android:orientation="horizontal"  
    app:layout_constraintTop_toTopOf="parent">  
  
    <ImageButton  
        android:id="@+id/imageButton"  
        android:layout_width="30dp"  
        android:layout_height="30dp"  
        android:scaleType="centerCrop"  
        android:elevation="4dp"  
        android:background="@drawable/round_logo_bg"  
        app:srcCompat="@mipmap/ic_launcher"  
        android:contentDescription="@string/app_name"  
        android:layout_marginEnd="15dp"/>  
  
    <TextView  
        android:id="@+id/title"  
        android:layout_width="wrap_content"  
        android:layout_height="wrap_content"  
        android:text="@string/app_name"  
        android:textColor="@color/white"  
        android:textSize="15sp"  
        android:textStyle="bold" />  
|  
|  
</LinearLayout>
```

*CardView with the Shadow and an Image :

Code :

```
<androidx.cardview.widget.CardView
    android:id="@+id/cardView"
    android:layout_width="357dp"
    android:layout_height="381dp"
    app:cardCornerRadius="20dp"
    app:cardElevation="10dp"
    android:background="@color/white"
    app:cardUseCompatPadding="true"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintEnd_toEndOf="parent"
    app:layout_constraintStart_toStartOf="parent"
    app:layout_constraintTop_toTopOf="parent">
```

```
<ImageView
    android:id="@+id/imageView5"
    android:layout_width="match_parent"
    android:layout_height="340dp"
    android:scaleType="centerCrop"
    app:srcCompat="@drawable/logo2" />
```

```
<TextView
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="Sample Logo/Image"
    android:background="@android:color/transparent"
    android:textColor="@color/black"
    android:layout_gravity="center|bottom"
    android:layout_marginBottom="14dp"/>
|
</androidx.cardview.widget.CardView>
```
